Work Experience

Associate Software Engineer • Cengage Group   *September 2021 - present*

- Creates and maintains new features for the MindTap School platform, working in an agile team
- Collaborates with the design team to create numerous reusable components for a new internal library, and subsequently integrate them into legacy code
- Integrated an industry-standard assessment API into legacy code, which was put into production
- Writes comprehensive unit and integration tests to ensure newly created components and views perform as expected and avoid regressions

Team Lead Brand Ambassador • Uptime Energy   *June 2019 - March 2020*

- Engaged prospective customers during events, contributing to new leads for the sales department
- Acted as an intermediary between the brand ambassador team and the field marketing manager
- Conducted weekly inventory within Google Sheets to maintain full stock of the product
- Transported up to 60 cases/day to multiple locations throughout New York City

Principal Production Cast Singer • Norwegian Cruise Lines   *October 2018 - March 2019*

- Performed up to 7 main-stage shows per week in addition to daily rehearsals
- Created, choreographed, and performed in a cabaret show for each cruise, including 5 performers
- Provided guests with an engaging experience offstage through live Q&As and backstage tours
- Responded calmly to problems onstage and backstage to maintain the integrity of each performance

Projects

Jeopardy Scorekeeper • Full-Stack Developer   *February 2021*

Your new favorite scorekeeping app for at-home Jeopardy: sleek, simple, and fun.
Stack: React Native, SQLite, Expo
- Created a comprehensive database for storing user, game, and score data.
- Designed and styled the entire app from scratch with custom CSS.
- Organized component routes to create an intuitive, easy-to-navigate scoring experience.

On The Run • Solo Full-Stack Developer • ontherun.herokuapp.com   *January 2021*

A user-friendly lifetime data visualization app for runners.
Stack: React, Redux, React Google Charts
- Built the single-page application with React, Redux, and React Google Charts.
- Stored thousands of data points in data structures for access in constant time.
- Designed a responsive and elegant site with Bootstrap and custom CSS.

Education

Grace Hopper Program at Fullstack Academy • NYC   *October 2020 - February 2021*
17 week immersive centered on full-stack Javascript web development

Point Park University • Pittsburgh, PA   *September 2014 - April 2018*
BFA Musical Theatre
